11th February 2002

Mr Ian Cornelius
President
Fuelstar International Limited
Box 5194 Wellesley Street
AUCKLAND

Dear Ian

As requested, I am happy to confirm that I installed a Fuelstar in my 1973 Mach I Mustang in 1996. Since then my car has performed well on 91 octane unleaded petrol with no sign of valve recession.

My car does not ping under load or fast acceleration and I have found the Fuelstar has prevented the fouling of spark plugs which still seem to be a problem for older cars using unleaded petrol and not using your product.

Several members of the Auckland Owners' Mustang Club have installed Fuelstar to their cars and all seem to be confident in and happy with the product.

Regards

Sam Shackleton
