Mr. Steve Cornelius,
Director-Operations
Fuelstar Australia Pty. Ltd.
P.O. Box 469,
Broadbeach. Qld. 4218

Dear Steve,

I am pleased to report that the Fuelstar cartridge fitted to my Vauxhall Carlton in the U.K. has resulted in a 12.5% improvement in fuel consumption since fitment and the engine is running sweeter than ever.

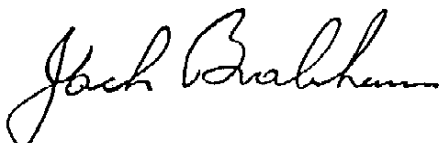

As you know, I arranged a dynamometer test some time ago. This showed a 5.5% improvement in power output at max. torque.

I have made enquiries through Powerplus in the U.K. and have satisfied myself that the product fully meets the claims of the manufacturer, including the ability to use ULP in engines designed to run on leaded petrol.

Consequently, we are now selling the products through our garages in the U.K.

Thank you for introducing the product to me.

Best regards,

Jack Brabham
