Ian Cornelius  
Fuelstar Combustion Technology Ltd  
Box 5194  
Wellesley Street  
AUCKLAND – NEW ZEALAND

Dear Ian,

From the beginning of our co-operation with Fuelstar as French distributor, we have installed more than thirty Fuelstar combustion catalysts on fishing boats without any mechanical problem. The first one has been installed in September 2003 and has worked more than 7,000 hours.

I have noticed that the Fuelstar combustion catalysts are particularly efficient on Cummins engines. We have installed them on ten KT38 engines and one on MTA 855, and got fuel savings rates between 7 % and 10 %.

Don't hesitate to contact me should you need further details.

Best regards,

Christian Paulezec
