31st August 06

To Whom It May Concern:

Ian Melville approached me to have a Fuelstar (Fuel Combustion Catalyst) installed into my motor vehicle VY Commodore sedan.

My work requires me to do a lot of driving within the state.

Prior to installing the Fuelstar I was using 9.9 litres/100 km over short trips (up to 100km)
And on longer trips approx 9.11 litres/100 km.

My last trip to Adelaide and return fuel consumption was down to 7.211 litres/100 km.

This has reduced my fuel consumption by almost 30%. I estimate this is saving me around \$18-
to \$25 every time I fill my tank.

I can recommend the Fuelstar product.

Yours truly,
