4 January 2006

Mr Ian Cornelius  
Managing Director  
Fuelstar Fuel Combustion Technology Ltd

Dear Ian

I confirm that we have been trialling Fuelstars for the past two years in several mine dump trucks owned and operated by Societe le Nickel at Thio and Kouaoua mines in New Caledonia. The trialing has revealed a fuel improvement in the order of 12 to 15%. This has been achieved in Cummins, Caterpillar and Komatsu engines.

I am now advised by SLN that they will progressively install the product in their total fleet. They have already ordered for more than 50 Nissan Navara 4WD service vehicles, also after successful trialling.

Best regards

Jean-Paul Fandoux  
Chief Executive Officer
